

Innovative Irish company have the only backup solution for Microsoft Dynamics Nav

keepITsafe, Ireland's largest online backup provider, have engineered a piece of software that can fully manage and backup Microsoft Dynamics Nav. This is the only fully automated off-site backup solution for Microsoft Navision on the market today. The solution automates the backup process by utilising the built-in backup function of Navision. It allows systems administrators to concentrate on more value added tasks rather than mundane backup chores.

This built-in backup routine is extremely sophisticated and will not only backup the data in the database but will also perform a consistency check, crucial to the security of data. An additional benefit offered by the solution is the fact that the backup can also run while others are using the database. It includes extensive error checking and error handling capabilities, which enable system administrators to take action if a problem should occur with the database.

The keepITsafe software automates the full backup process by encrypting the data and all new data is transferred securely offsite to the keepITsafe datacentres located in Dublin. The keepITsafe Navision backup solution guarantees the consistency of the database backup. All information is stored on Dell RAID configured servers, mirrored to a secondary site for full redundancy and protected by the keepITsafe €1,000,000 Data Protection Guarantee.

Companies such as Origo, Sysco, Odenberg, HeaveyRF, Eircom and William Cox are benefitting from the keepITsafe Navision backup. *"As Ireland's leading Microsoft Gold Certified Partner and with the largest Navision customer base in the country it is crucial that we can provide our customers with around the clock backup for their businesses. The keepITsafe Backup Utility is used to automatically check the consistency of the Navision data inside the SQL Server. Data can be restored quickly and gives our customers the crucial consistency check that their data is continuously being monitored in a secure environment", stated Charlie Donnelly, Managing Director, Sysco Software Solutions.*

About keepITsafe

Founded in 2003, keepITsafe believes that business owners should not have to think or worry about backup. The company has provided a reliable, secure and affordable online backup solution to over 1000 clients and 100 partners to date. The success of the company is built on their knowledge of backup systems and knowing how to reduce the risk of backup disasters. keepITsafe realizes that the key to any business success is company information and protecting critical data. www.KeepITsafe.ie
